Portfolio

Education

University of Warwick

Computer Science, Bachelor of Science (BSc) with Honours — Grade: Expected First-Class, Warwick Gold Award

Sep 2023 – Jul 2026

Coventry, United Kingdom

- Relevant Modules: AI, ML, Neural Computing, Algorithms, Data Structures, Databases, OS, Networks, Compilers, Security, Data Analytics, Discrete Maths, Graph Theory, Probability & Statistics

K. International School Tokyo (KIST)

IB Diploma Programme — Grade: 40 / 45, Bilingual Diploma awarded

Sep 2021 – Jun 2023

Tokyo, Japan

- Subjects: Mathematics AA (7), Physics (6), Japanese A (6), Economics (7), Chemistry (6), English A (5), TOK (A), Extended Essay (A)
- Extracurriculars: President of IT club, Vice President and Treasurer of Student Representative Council

Experience

Crypton Future Media, Inc.

Full-Stack Web Development Intern

Aug 2025 – Sep 2025

Sapporo, Japan

- Built a “Pinterest × Creative Commons” web app for the Vocaloid community, where creators upload illustrations with explicit license terms (non-commercial, derivative, attribution) and music producers discover artworks for track thumbnails and contact the creators.
- Developed a swipe-based discovery UI (“Tinder-style”) using React, and programmed the backend in Laravel to rank candidates by hashtags, categories, and artworks pinned on users’ artboards.
- Provisioned a fresh AlmaLinux cloud instance and deployed the app by configuring the Nginx web server and MySQL user permissions.
- Delivered the project end-to-end in 2 weeks and demoed live to the CEO, 20+ engineers, and HR, earning praise for decision-making and task prioritisation, and received a return offer.

Empath Inc.

Software Development Engineer (SDE) Intern

Jul 2022 – Aug 2022

Tokyo, Japan

- Designed an API that detects users’ emotions from their voice tone with AI and maps matching facial expressions on a VR avatar.

Fujitsu Ltd.

Quantum Machine Learning Research Intern

Jun 2022 – Jul 2022

Tokyo, Japan

- Scaled an ML pipeline to transform Digital Annealer states into probabilistic causal graphs, boosting anomaly-detection recall by 12%.

Warwick Vocaloid Society (WVS)

President and Founder

Nov 2023 – Feb 2025

Coventry, United Kingdom

- Founded the first Vocaloid society in the UK and grew it to 300+ members, inspiring derivative societies to be created across the UK, earning a nomination for Best New Society at the 2025 Warwick Student Union Awards.
- Organised a voice synthesis workshop, enabling members to record and transform their voices into custom Vocaloid-style voicebanks, capable of singing any song with precise pitch and timbre control.
- Expanded reach to external audience by growing society’s social media (Xiaohongshu) to 2,000+ followers and 11,300+ likes through viral event highlights (live concerts and societies fairs); later featured on national TV by NHK (Japan’s BBC-equivalent broadcaster).

Muzartt via MIT LaunchX

Chief Technology Officer (CTO) and Co-Founder

Jun 2020 – Oct 2023

California, United States (remote)

- Created a dementia therapy app and delivered it to care homes by running agile feedback loops with Harvard Business School mentors.

KIST Information Technology

President, Founder (Sep 2019 – Aug 2022) and Technical Leader (Aug 2022 – Jun 2023)

Sep 2019 – Jun 2023

Tokyo, Japan

- Founded and led the largest student club in the school’s 27-year history, enrolling over 25% of all KIST students.
- Designed and taught 30+ tech courses for students, including ML in Python, functional programming in Haskell, and web dev in Ruby.

Projects

WVS Official Website | [Laravel](#), [React](#), [MySQL](#) | [vocaloidsoc.co.uk](#) | [Source Code](#)

Feb 2024 – Present

- Created a website for my society with a custom CMS for managing multi-form media, announcements, and event registration, improving executives’ workflow and content update speed. Served 10,000+ page views from launch by optimising UX using React and Tailwind.

Resolution Theorem Prover | [Prolog](#)

Feb 2025 – Apr 2025

- Programmed a resolution engine to test whether a propositional formula is a logical consequence of a given set of premises.
- Developed a CNF transformer using structural pattern matching and recursive decomposition of formulas into alpha- and beta-types.

Network Intrusion Detection System (NIDS) | [C \(Linux\)](#), [libpcap](#), [POSIX Threads](#)

Nov 2024 – Dec 2024

- Built a multithreaded NIDS to detect SYN floods, ARP poisoning, and blacklisted URL access by parsing raw packets and HTTP payloads.
- Implemented a thread pool and concurrent work queue for scalable packet analysis with signal handling and memory-safe shutdown.

Film Database System | [Java](#), [JUnit](#), [JavaCC](#)

Feb 2024 – May 2024

- Engineered a film database system handling real-world datasets of 17,000+ ratings and 11,000+ cast entries by implementing data structures from scratch, such as AVL trees, linked lists, and hash maps.

Technical Skills

Languages: Python, Java, C++, MATLAB, JavaScript, TypeScript, C, Bash, SQL (PostgreSQL, MySQL, SQLite), Prolog, Haskell, Ruby

Developer Tools: Amazon Web Services (AWS — EC2, S3, Lambda, Route 53, Cloud9), Docker, Git (GitHub, GitLab), Nginx, Apache

Frameworks / Libraries: React, Node.js, Express.js, Laravel, Flask, Ruby on Rails, Vite, Tailwind CSS, Three.js, jQuery, Jinja, libpcap
